

Priority Add List (PAL)

At this time, Priority Add Lists are available for only a few courses as determined by the academic division. For those classes utilizing the PAL, the student is given the option to be placed on the PAL at the time of registration, if the class is closed.

It is important to note that placement on the PAL will not move the student automatically into the next open space created when another student drops the class. If the class remains closed, the PAL sets the priority for the instructor when authorizing additional enrollments through the Add Permit Code process.

The Priority Add List is available along with the online roster in MySite and will printout along with the roster if anyone is on the list and if that option is chosen.
