Welcome to RapidTech!

RapidTech is an educational entity that is part of Saddleback College and partially funded by the National Science Foundation. The National Center assists businesses, educational institutions, entrepreneurs and community-based organizations develop new products and designs using innovative rapid prototyping technologies, additive manufacturing, and reverse engineering. The vigorous educational program offers learning opportunities for interested students to learn and use these advanced technologies while collaborating on projects with national businesses in the aerospace, medical device, automotive, consumer products and art animation industries.

RapidTech specializes in

- Product development
- Early Stage Concept models
- Reverse engineering
- Rapid prototyping
- Additive manufacturing
- Data manipulation and file repair
- Packaging assistance
- Resin Casting
- Economic development workshops
- Business seminars
- Corporate Training

Goals of RapidTech

RapidTech’s vision is to serve as an expert resource, partner and consultant to businesses and educational institutions requiring rapid prototyping and additive manufacturing assistance.

RapidTech

- Develops new curriculum programs, based on input from industry, in such new technologies as Stereolithography, Selective Laser Sintering, Laser Scanning, Fused Deposition Modeling and 3D Printing. The curriculum is based on industry's workforce needs. Graduates of these programs will be prepared for careers in new fields such as additive manufacturing and rapid prototyping.

- Prepares faculty for the development and implementation of industry-driven, next-generation manufacturing coursework and laboratories. The program develops work-based learning curriculum projects for students, which are disseminated through hands-on workshops, seminars, conferences, and distance education learning.

- Increases opportunities for collaborations between businesses and schools which will ultimately increase the pool of qualified technicians in the workforce and provide businesses with affordable prototyping and design products and solutions.

Funding for RapidTech is provided by the Advanced Technology Education program of the National Science Foundation. For information on other Center grants, go to http://www.atecenters.org/.

RapidTech...Offering truly "Best of the best" in rapid prototyping education.
