

COLLEGE SERVICE AREAS BOUNDARIES AND ATEP CAMPUS USE

The District consists of the following colleges and campuses:

1. Irvine Valley College
2. Saddleback College
3. Advanced Technology Education Park (ATEP)

Saddleback College and Irvine Valley College have effectively used established college service areas.

The district draws no boundaries for admissions by students or for the programs and services afforded by either college. In order to avoid duplication when both colleges offer the same courses, programs, and services, each college will have the “right of first refusal” in providing those courses or services within its defined service area. A district-wide process including an Administrative Regulation will be developed and utilized to review, support and resolve these matters.

The South Orange County Community College District Board of Trustees supports and upholds the established alignment with El Toro Road, Modjeska Canyon, Santiago Canyon, Wood Canyon, Aliso Creek and Victoria Beach as the boundary line for college service areas, while noting and continuing the traditional assignment of the Laguna Woods community to Saddleback College. With this boundary line established, Irvine Valley College will be primarily responsible for educational services north of the service area boundary line and Saddleback College responsible for educational services south of the service area boundary line.

An additional overlaid service area that includes the whole SOCCCD District area is established for the ATEP campus site for approximately equal use by Saddleback College and Irvine Valley College to offer complementary and non-competitive workforce development, advanced technology and career technical education programs district-wide. College programs at ATEP will serve the entire district service area at large with a continued focus on workforce development, advanced technology and career technical education (CTE).

The colleges and district services staff will establish an administrative regulation supporting the process for the routine review and approval of courses, programs and activities to be scheduled at the ATEP campus site.
