What is Tech Prep?

Tech Prep programs promote a bridge between secondary and post secondary programs. The programs provide academic and vocational preparation in an identified career pathway. Students under the Tech Prep program commence their education in a secondary institution and then transition into a post secondary institution to earn an advanced technical degree or certificate. The career pathways available in the Tech Prep program are academically rigorous. These pathways provide the students with the basic skills for post secondary admission and also provide the technical skills to enable these students to have productive and successful careers.*

There is no cost for the Tech Prep program. Successfully completed Tech Prep credits earned at designated high schools and/or ROPs (Regional Occupational Programs) can be converted to Saddleback College credit upon enrollment at the college. See [Articulation](#) for details.

This project is funded by the [California Community Colleges Chancellor's Office](#) and the [California Department of Education](#). No person shall, on the grounds of sex, race, color, national origin or disability, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under this project.
