**Instructor-to-Student Contact:** *Announcements and/or Email must be selected with a frequency identified.*  
*Then, at least one more type of instructor-to-student contact (choices 1-6) must also be identified. Keeping in mind that more than one instructor might teach this class, selections should reflect minimum requirements as determined by the department. Individual instructors can always add more.*

Course Quality Standards:
The section below captures representative adaptations to assignments, methods of evaluation or grading criteria that might be utilized when the course is taught online. When there are no differences, the check box in the “same as traditional” area can be used. Keep in mind that this addendum applies to any instructor who teaches the course, so any adaptations described will be representative samples not required elements.

**Accessibility Standards (from AR 6112)**

The following general principles should be followed to the extent possible to ensure that distance education courses are accessible to students with documented disabilities in compliance with Section 508

- Distance education courses are designed for all students to fully participate and benefit from an equitable college experience
- Instructional materials and textbooks permit maximum opportunity for access by students with documented disabilities without the need for outside assistance (i.e. Sign-language interpreters, aids, or other forms of human assistance).
- Distance education resources provide “built-in” accommodation where possible (i.e. closed captioning or descriptive narration) and /or interface design/content layout per best practices commonly used in support of persons with disabilities
- Alternative testing format and extended test taking time are provided which address the student’s documented disability and impact on his or her academic performance.
